

Quick Start – Google Docs

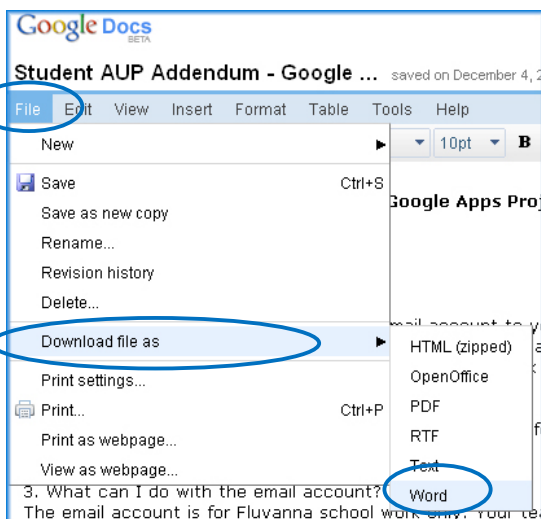

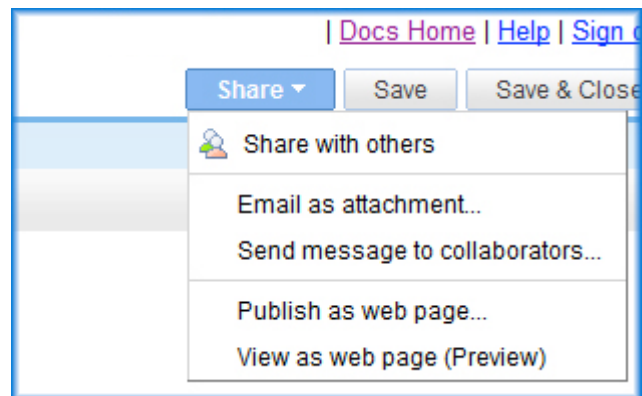

Login: <http://docs.google.com>

Create a new document by clicking 'new' in the top left of the screen

Google has 'auto save' built in - every document is *continuously backed up*, every edit is saved, and you can always return to any previous version of a document!

Collaborate on a document by clicking the 'share' button on the right of the document window. Choose how and with whom you'd like to share.

If you need to get a document "out of" Google Docs, choose the 'File' menu, then 'Download file as...' and select your desired export format.
